

# **© POWER RATING**

| Engine<br>Speed | Type of<br>Operation | Engine Power |     |
|-----------------|----------------------|--------------|-----|
| rev/min         |                      | kWm          | Ps  |
| 1800            | Prime Power          | 150          | 204 |
|                 | Standby Power        | 165          | 224 |
| 1500            | Prime Power          | 128          | 174 |
|                 | Standby Power        | 141          | 191 |

Note : -. The engine performance corresponds to ISO 3046, BS 5514 and DIN 6271.

\* Without cooling fan, inter cooler inlet water temperature 32  $^\circ\!\!\mathbb{C}$ 

- -. Ratings are based on ISO 8528.
  - → Prime power available at variable load. The permissible average power out put (during 24h period) shell not exceed 70% of the prime power rating. No overload is permitted.
  - $\rightarrow$  Standby power available in the event of a main power network failure. No overload is permitted.
